ABSTRACT

The selected bibliography on diagnostic teaching contains approximately 48 abstracts with indexing information explained to be drawn from the computer file of abstracts representing the Council for Exceptional Children Information Center's complete holdings as of August, 1972. Abstracts are said to be chosen using the criteria of availability of document to user, currency, information value, author's reputation, and classical content. Preliminary information explains how to read the abstract (a sample abstract is included which identifies the different parts of the abstract), how to use the author and subject indexes, how to purchase documents through the Educational Resources Information Center Document Reproduction Service (an order blank is provided), an order blank for Exceptional Child Education Abstracts in which the abstracts are originally published, a list of indexing terms searched to compile the bibliography, and a list of journals from which articles are abstracted for the bibliography. Publication date of documents abstracted ranges from 1965 to 1971. (CB)

The CEC Information Center on Exceptional Children

With a grant from the US Office of Education, the CEC Information Center was established at The Council for Exceptional Children to serve as a comprehensive source of information on research, instructional materials, programs, administration, teacher education, methods, curriculum, etc. for the field of special education. The Center functions as the Clearinghouse on Exceptional Children in the Educational Resources Information Centers (ERIC) program and also as a member center in the Special Education IMC/RMC Network. In addition, the CEC Center's program includes a commitment to a concentrated effort towards the development of products which will interpret research results into educational methods and practices.

How to Use This Bibliography

The *Exceptional Child Bibliography Series* was initiated by the CEC Information Center to answer the need for rapid responses to specific requests for information. The volume of information requests received by the Center is analyzed and used as a guide in preparing special topic bibliographies in the field of exceptional child education. Abstracts contained in the bibliographies are drawn from the computer file of abstracts which represents the CEC Information Center's complete holdings as of the date indicated on each bibliography.

Selective editing by Information Specialists is performed on each bibliography. From the total number of abstracts drawn from the file on a particular topic, selection is made of only those judged to best meet the following criteria: availability of the document to the user, currency, information value, author's reputation, and classical content. The number of abstracts selected to appear in a bibliography may vary from one to 100, depending on the amount of suitable information available. Updating of bibliographies as new material becomes available is accomplished when the volume of new material reaches 25 percent of presently available material on a given topic.

How to Read the Abstract

Each abstract contains three sections—bibliographic data, descriptors, and a summary of the document. The bibliographic section provides the document's identifying number (ED and/or EC), publication date, author, title, source, and availability. The descriptors indicate the subjects with which a document deals. The summary provides a comprehensive overview of the document's contents and in some cases document availability is announced here.

How to Use the Indexes

Some bibliographies in *Exceptional Children Bibliography Series* contain author and/or subject indexes. In these bibliographies, readers seeking work on a specific aspect of the general topic may consult the subject index to be referred to specific abstract numbers. Abstracts dealing with several topics may be identified by finding the same abstract number under two or more subjects in the subject index.

How to Purchase Documents

Documents with an ED number and EDRS availability indicated may be purchased from the ERIC Document Reproduction Service (EDRS). For your convenience an order form is provided on the back cover of this bibliography.

Abstracts appearing in the bibliographies have also been published in *Exceptional Child Education Abstracts*, the quarterly abstract publication of the Council for Exceptional Children. Approximately 750 abstracts covering the broad range of exceptionality appear in each issue. (Subscription order form below.)

Summary → **Five papers discuss cooperative work-study agreements between schools and vocational rehabilitation services in the western states. Areas discussed include the advantages of cooperative agreements, the forms and disadvantages of third party agreements, basic concepts of the programs, and an outline form to use when applying for matching funds; the relationship of special education, rehabilitation and cooperative plans, programs, and agreements; and California's past and present work study programs for the mentally retarded. Also reviewed are research demonstrating the economic feasibility of vocational training for the educable mentally retarded in the public schools and communication problems in work study programs. The conference summary considers the purposes, goals, essence of, and necessity for cooperative agreements. (MK)** ← Abstractor's initials

ABSTRACT 10480

EC 01 0480 ED 014 176
 Publ. Date 29 Apr 66 33p.
 Barsch, Ray H.; Bryant, N. Dale
The Education of Children with Learning Disabilities (Rutgers, The State University, New Brunswick, New Jersey, April 29, 1966).
 Rutgers Univ., New Brunswick, N. J.
 EDRS mf, hc

Descriptors: exceptional child education; learning disabilities; remedial instruction; special classes; dyslexia; psychoeducational processes; children; diagnostic teaching; educational improvement; learning theories; perceptual development; teaching methods; clinical diagnosis; educational programs; classification

Papers by two speakers are presented, together with brief bibliographies (totaling 15 items) of their recent articles. A Perspective on Learning Disabilities and the Concept of Movement Efficiency by Barsch, surveys the problem of classifying children in educational programs and suggests that classes for special learning disabilities be part time units which prepare the children for return to other classes. The child's disability depends on the child, the task, and the learning situation. An experimental classroom in Madison is described. In the Role of the Clinical Educator in the Diagnosis and Treatment of Learning Disorders, Bryant discusses three major areas of knowledge crucial to diagnosis and treatment of learning disabilities: (1) knowing the multitude of component steps necessary for learning any skill, (2) understanding the nature of the disability, and (3) using learning principles to avoid or overcome handicaps by progressing toward each learning goal. The dyslexic child is used as an example of learning disability. Guiding principles include: starting with the most basic element with which the child has trouble, making the steps small enough (90 percent correct responses), and avoiding negative learning and confusion. The child should make noticeable improvement at every lesson. Overlearning and reviews will help keep retention high. This document is available from the New Jersey Association for Brain Injured Children, 61 Lincoln Street, East Orange, New Jersey 07017. (JA)

ABSTRACT 10623

EC 01 0623 ED 024 183
 Publ. Date 68 373p.
 Hewitt, Frank M.
The Emotionally Disturbed Child in the Classroom; A Developmental Strategy for Educating Children with Maladaptive Behavior.
 EDRS not available

Diagnostic Teaching

Allyn And Bacon, Inc., 470 Atlantic Avenue, Boston, Massachusetts 02210 (\$10.60).

Descriptors: exceptional child education; emotionally disturbed; teaching methods; learning; children; educational diagnosis; educational strategies; educational objectives; classroom techniques; classroom design; program evaluation; curriculum; attention control; learning characteristics; behavior; behavior change; learning experience; achievement; Santa Monica Project

The emotionally disturbed child is presented as a learning problem whose difficulties can be helped by the teacher and school. The description of educational goals, methodology, and assessment includes the psychodynamic-interpersonal, sensory-neurological, and behavior modification strategies; a developmental sequence of educational goals; methodology of the learning triangle of task, reward, and structure; and educational assessment of emotionally disturbed children. Specific classroom practices detailed concern attention level, response level, order level, exploratory and social levels, and mastery and achievement levels. Total classroom design for emotionally disturbed children is explained, and the curriculum of the Santa Monica Project which developed and evaluated engineered classroom design is reviewed. Appendixes provide a student assessment inventory, parent and teacher rating scales, task attention criteria, and a bibliography of 208 items. (JD)

ABSTRACT 10690

 Publ. Date 67 8p.
 Joanne Marie, Sister
Evaluation: A Diagnostic-Remedial Approach.
 Cardinal Stritch College, Milwaukee, Wisconsin, Special Education Department
 EDRS not available
 Special Education; V41 N3 P35-42 1967
 Descriptors: exceptional child education; learning disabilities; teaching methods; tests; language development; cognitive processes; reading; reading difficulty; reading diagnosis; diagnostic tests; children; psycholinguistics; educational diagnosis; language tests; Illinois Test of Psycholinguistic Abilities; ITPA

Steps in the diagnostic-remedial process include gathering of data for diagnosis, analyzing of symptoms, and determining of the nature and extent of correlated disabilities. Influential in the diagnostic remedial approach to learning disabili-

ties is the Illinois Test of Psycholinguistic Abilities (ITPA), for children aged 2 1/2 to 9, which has nine subtests assessing specific psycholinguistic areas. Its use as a screening and evaluation instrument and as an aid to remedial programming is demonstrated by the case histories and ITPA profiles of three children. Two questions of technique are raised: whether to teach the child's strengths or his weaknesses and what to teach once the method is determined. A bibliography cites 12 items. (JD)

 Paper Published In International Approach To Learning Disabilities Of Children And Youth, Third Annual International Conference (Tulsa, Oklahoma, March 3-5, 1966), Pages 45-66.

Descriptors: exceptional child education; learning disabilities; identification; perception; tests; perceptually handicapped; visual perception; auditory perception; language; cognitive processes; clinical diagnosis; remedial programs; perceptual motor coordination; teaching methods; intelligence; Frostig Developmental Test of Visual Perception; Illinois Test of Psycholinguistic Abilities; (ITPA); Wechsler Intelligence Scale for Children

The diagnosis and remediation of learning problems are considered in the areas of sensory-motor ability, auditory perception, visual perception, language, and thought processes. The use of the following tests for evaluation is discussed: Wepman Test of Auditory Discrimination, Frostig Developmental Test of Visual Perception, Illinois Test of Psycholinguistic Abilities, Wechsler Intelligence Scale for Children, and several sensory-motor tests. Training programs for remediation of each area are outlined, and emotional and social development is treated. A table compares factors of the structure of the intellect at chronological age 6 with the abilities tapped by the Illinois, Frostig, and Wechsler tests. A bibliography cites 35 entries. Appendixes describe the Frostig and the Illinois tests by providing examples and explain-

ing functions covered by the tests and training procedures which follow. Factors in human movement and physical education programs (with six references cited) as well as basic results on four tests are tabularly arranged. (DF)

ABSTRACT 11202

EC 01 1202 ED N.A.

Quay, Herbert C. And Others
Remediation of the Conduct Problem Child in the Special Class Setting.
EDRS not available
Exceptional Children; V32 N8 P509-15
Apr 1966

Descriptors: exceptional child education; behavior; emotionally disturbed; teaching methods; educational needs; special classes; problem children; behavior change; remedial instruction; individual characteristics; teaching techniques; behavior problems; socially deviant behavior; aggression; anti social behavior; reinforcement; public schools; skill development; professional personnel

The principles and assumptions described are those which underlie an experimental special class for conduct problem children which has been developed cooperatively by an interdisciplinary University of Illinois research center and the Urbana Public Schools. A conceptualization of the nature of the children's behavior disorders is offered, and some principles of behavior modification and remediation of academic deficiencies are discussed. Some particular characteristics of the conduct problem child relevant to the education process are outlined. Empirical attempts at training visual orientation to the teacher in a group setting, individualized remediation of retardation in basic academic skills, and teaching social skills are described. Also considered are factors relevant to remedial efforts within the public school setting, including the problem of group versus individual techniques, the role of mental health professionals, the place of other than classroom treatment, the goals of the special class, and the utilization in the regular class of techniques developed in the special class. A bibliography lists 17 items. (JW)

ABSTRACT 11482

EC 01 1482 ED N.A.
Publ. Date 67 20p.
Frostig, Marianne
Testing as a Basis for Educational Therapy.
EDRS not available
Journal Of Special Education; V2 N1
P15-34 Fal 1967

Descriptors: exceptional child education; visual perception; testing; perception tests; psycholinguistics; auditory discrimination; intelligence tests; student evaluation; learning disabilities; Illinois Test of Psycholinguistic Abilities; Wechsler Intelligence Scale for Children; Frostig Developmental Test of Vis-

ual Perception; Wepman Test of Auditory Discrimination

The clinical approach to education is discussed and the basic test battery used at the Marianne Frostig Center for children with learning disabilities is presented. Use of the battery (which includes the Frostig and Wepman tests, the Illinois Test of Psycholinguistic Abilities, and the Wechsler Intelligence Scale for Children) is described in terms of interpreting relationships among test scores and determining educational procedures from the results. The tests are summarized, and the abilities they tap are compared with factors of the structure of the intellect at age 6. Descriptive data are provided on difficulties assessed by initial test scores of 78 children referred to the Center for learning difficulties. (LE)

Office Of Education (DHEW), Washington, D. C., Bureau Of Research
EDRS mf,hc
OEG-32-24-0210-1011
BR-5-0350

Descriptors: exceptional child research; disadvantaged youth; preschool children; adjustment (to environment); achievement; mentally handicapped; language development; motor development; social development; intellectual development; educable mentally handicapped; slow learners; culturally disadvantaged; preschool programs; kindergarten children; educational diagnosis; curriculum; curriculum development; curriculum evaluation; cognitive processes; psychological patterns

A study investigated the effectiveness of a 1-year diagnostic preschool curriculum in improving regular school adjustment and achievement of 142 psychosocially deprived children (age 5, IQ's 53 to 85). In each of 3 years, approximately 15 children were placed into an experimental preschool, a kindergarten contrast, or an at-home contrast group. Curriculum procedures were designed to remedy specifically diagnosed deficits in the areas of intelligence, language, motor, and social development. By the end of the treatment year, the experimental groups ranked significantly higher than the contrast groups in all of the areas named above. Followup study through the second grade for the 1st year group and through the first grade for the 2nd year group indicated that the groups no longer differed significantly in any area except that of social development, which continued to be higher for the experimental groups. School academic achievement appeared not to be related

to overall IQ change, but rather to specific intellectual processes that contributed to the IQ change; that is, if children made gains on items related to memory, vocabulary, and motor development, the prognosis for their first grade academic success was better than if they made gains on items related to concept formation and abstract reasoning. (Author/J1D)

ABSTRACT 11984

Dechant, Emerald
Diagnosis and Remediation of Reading Disability.
EDRS not available
Parker Publishing Company, Inc., Village Square Building, West Nyack, New York 10994 (\$8.95).

Descriptors: exceptional child education; learning disabilities; reading; teaching methods; instructional materials; dyslexia; reading difficulty; testing; remedial reading; clinical diagnosis; instructional materials; identification; prevention; remedial reading programs; reading instruction; program planning; individualized instruction

Intended for the classroom teacher, the text presents methods for preventing, diagnosing, and remediating reading problems. Areas considered include identification of the difficulty, diagnostic testing, investigation of causes, and organization and implementation of remediation. A survey of reading methods is provided, along with a discussion of meeting the individual needs of children whose reading problems are compounded by other handicapping conditions. Various remedial procedures are described; guidelines are offered and materials listed in the areas of skill improvement materials, audiovisual materials, mechanical devices, and professional books. Information is appended regarding the following: tests of intelligence and reading readiness as well as reading survey, diagnostic reading, and oral reading tests; the role of the reading specialist; and 43 test and 231 book publishers. (LE)

Valett, Robert E.
Programming Learning Disabilities.
EDRS not available
Fearon Publishers, 2165 Park Boulevard, Palo Alto, California 94306.

Descriptors: exceptional child education; learning disabilities; program planning; psychoeducational processes; evaluation methods; psychological evaluation; diagnostic teaching; reinforcement; sensory integration; perceptual motor coordination; administrative policy; identification; records (forms); teaching methods; instructional materials; class organization; classroom design; ancillary services; clinical diagnosis

Written primarily for use by persons

concerned with the establishment and operation of learning disability programs, the text presents a rationale for programming, definitions, examples, and educational rationales for basic learning abilities, and a model school district policy statement. Preliminary screening, psychological evaluation, a developmental task approach to education, the diagnostic-prescriptive teacher, and the development of sensory-motor and perceptual skills are discussed. Suggestions are made for prescriptive programming and program organization; the rationale and methods for behavior modification and supporting programs and services are considered. Sample letters, forms, and records, behavior rating scales, evaluation sheets, schedules, lists of equipment and supplies, and lesson plans are provided. (RJ)

ABSTRACT 20240

Strang, Ruth

Diagnostic Teaching of Reading.
EDRS not available
McGraw-Hill Book Company, 330 West 42nd Street, New York, New York 10036 (\$8.50).

Descriptors: exceptional child education; reading; teaching methods; reading diagnosis; remedial reading; reading tests; interviews; case studies (education); reading instruction; diagnostic tests; classroom observation techniques; reading skills; diagnostic teaching; evaluation methods; learning disabilities; teacher role; oral reading; reading interests; dyslexia

Designed for a first course in the diagnosis of reading difficulties or for a major part of a comprehensive course in the teaching of reading, the text clarifies diagnostic theory, develops applications, and suggests specific ways to carry out the procedures described. Specific examples and cases illustrate the use of various diagnostic and remedial procedures at both elementary and secondary school levels. Excerpts from recorded interviews form the basis of a study of interview techniques. Discussions of group methods include the role of the teacher in diagnosis, observation in the classroom, oral reading as a diagnostic technique, introspective-retrospective reports, ascertaining interests, and the contribution of tests. Individual methods featured are physical factors in reading diagnosis, reading tests administered individually, indicators of reading potential, interview techniques, projective methods, and interpretation, synthesis, and treatment. Each chapter includes references and suggested readings. (L.E)

Descriptors: exceptional child education; teaching methods; reading; identification; student characteristics; educational diagnosis; clinical diagnosis; remedial reading; reading comprehension; vocabulary; parent role; special programs; instructional materials; specialists; dyslexia; teacher role; testing; administrator responsibility; learning disabilities

Providing a communication link between the classroom teacher and the reading therapist, the text provides guidelines and specific, tested methods which will give success and satisfaction to the problem reader. Chapters deal with the following topics: characteristic traits and reactions of problem readers; basic, noneducational, and educational diagnosis; principles of remediation and remedial techniques for orientation, vocabulary, and comprehension difficulties; evaluation in remedial reading; parents' role in diagnosis, remediation, and prevention; and professional responsibilities and programs. Suggested readings are listed at the close of each chapter. Appended charts describe 38 diagnostic instruments and 59 remedial materials and provide addresses of publishers of instructional materials. (JD)

ABSTRACT 20429

Smith, Robert M., Ed.
Teacher Diagnosis of Educational Difficulties. Merrill's International Education Series.
EDRS not available
Charles E. Merrill Books, Inc., 1300 Alum Creek Drive, Columbus, Ohio 43216.

Descriptors: exceptional child education; learning difficulties; teaching methods; educational diagnosis; identification; student evaluation; informal reading inventory; reading; spelling; writing; arithmetic; speech; language skills; perceptual motor coordination; sociometric techniques; diagnostic teaching; individual development; intelligence; classroom techniques

Methods are presented in seven chapters by specialists in early academic and personal development for individual diagnosis and remedial procedures with the emphasis on informal diagnostic methods which the teacher can use in the classroom every day. Included are discussions of the fundamentals of informal educational assessment, the educational irrelevance of intelligence, and perceptual motor skills. Techniques are provided for analyzing performance in reading skills, written expression and spelling, speech and language disorders, arithmetic skills, and personal-emotional-social skills. A recapitulation is presented and each chapter includes references. (L.E)

Jones, Joyce
Dyslexia: Identification and Remediation in a Public School Setting.
EDRS not available
Journal Of Learning Disabilities, V2 N10 P533-8 Oct 1969

Descriptors: exceptional child research; dyslexia; remedial programs; individualized instruction; reading improvement; nonprofessional personnel; testing; reading achievement; learning disabilities

A Title III grant made possible a 1 year experimental program to determine if children with the specific reading disability, dyslexia, could be remediated by the use of a structural-linguistic procedure taught through a multisensory approach. This remedial procedure was taught on a one-to-one basis of instruction through the use of para-educational personnel under close supervision in a regular public school setting. During the years of the program 78 students attended the full day Perceptual Development Center Program and 545 students participated in an hour-a-day reading program. Test-retest data revealed that students receiving this specialized training improved in reading skills and retained this gain or further improved after dismissal from the program. (Author)

Descriptors: exceptional child education; learning disabilities; emotionally disturbed; handicapped children; educational diagnosis; individualized programs; therapeutic environment; interdisciplinary approach; school personnel; individual development; learning theo-

ries; teaching methods; diagnostic teaching; educational strategies

The book provides a methodology for dealing with a wide range of problems in the regular classroom or in special education. Ways to convert diagnostic findings into classroom procedures are explained in an informative manner to readers who are not specialists in psychology. Content includes discussions on the following: an introduction with a definition, use of diagnostic resources, principles of guidance, and an overview of the prescriptive teaching method; the development of the principle of structure in the learning process; methods for diagnosis; ways to translate diagnostic findings; a discussion on the education of the exceptional child; three examples of teaching prescriptions; means of communication; a discussion on the teacher and the teaching process; a chapter on the follow-up method for instruction improvement; and conclusions. Diagnostic teaching is defined and individual differences in learning styles and in specific learning skills are delineated, including inhibited, undisciplined, anxious, and creative styles, and attention, motor, visual, auditory, conceptual, and automatic skills. Classroom methods for assessment of individual differences are outlined, and ways of harmonizing the curriculum with individual differences are suggested. There are 80 references and author and subject indexes. (LJ)

A Proposed Model for Selecting, Modifying, or Developing Instructional Materials for Handicapped Children.
EDRS not available
Focus On Exceptional Children; V1 N9 P1-9 Feb 1970

Descriptors: exceptional child education; instructional materials; models; material development; learning disabilities; diagnostic tests; educational diagnosis; perceptual development; motor development; language development; symbolic learning; learning

A system to enable teachers to analyze instructional materials and to modify

and develop materials for children with learning disabilities is presented. The development of the Instructional Materials Center Network for Handicapped Children and Youth and emphasis upon diagnostic testing are discussed as significant contributions to exceptional child education. The Instructional Model which is presented suggests a conceptual framework for evaluation of needed instructional experiences and includes a learning component (motor learning, perceptual learning, language learning, symbolic learning) and a component of input-output systems of receiving and expressing information at each learning stage. (MS)

Prescriptive Teaching in a Summer Learning Disabilities Program.
EDRS not available
Journal Of Learning Disabilities; V3 N4 P220-7 Apr 1970

Descriptors: exceptional child research; learning disabilities; summer programs; diagnostic teaching; program descriptions; reading comprehension; teaching methods; perceptual motor learning

Since the prevention and treatment of chronic failure has been a serious problem since the beginning of the American educational system, the intent of the study was to examine the academic achievement and changes in behavior related to a specified kind of curriculum during a six-week summer program. A unisensory perceptual training curriculum was selected in order to utilize the child's strongest perceptual area at the beginning of training, while weaker perceptual areas were avoided initially. Emphasis was on utilizing language cues as a compensatory behavior to strengthen perceptual deficits. The program was designed to alter the learning sets and to modify the behaviors of children with learning disability manifested in chronic failure. (Author)

Elementary School Journal; V70 N5 P265-70 Feb 1970

Descriptors: diagnostic teaching; teacher education; models

Operational steps in the use of the services of a diagnostic teacher are outlined, and support needed from the principal is described. Minimal criteria which must be met by the schools in order to have a diagnostic teacher program are set forth and include a classroom, an understanding principal and faculty, and awareness of the need for continuing evaluation and growth. Also discussed is the education of diagnostic teachers with focus on programs in Washington, D.C. (RJ)

Descriptors: exceptional child education; learning disabilities; educational diagnosis; diagnostic teaching; academic achievement; identification; screening tests; program evaluation; cost effectiveness; incidence; underachievers

A Chicago suburban public school with approximately 450 children per grade level demonstrated a system-wide program for identification diagnosis, and educational treatment of children with learning disabilities in grades 2 through 6. Children were judged to underachieve when achievement measures in language or mathematics fell more than 10% below the expected level based on age, IQ, and grade placement. During the 3 year project, a screening program was developed and employed with 2,300 children. A novel remedial program was carried out for 156 children. Specialists in learning disabilities refined the screening diagnosis and developed teaching prescriptions for all students. Much of the teaching was carried out by teachers with minimal special training. The procedures developed may be especially useful to districts initiating a learning disabilities program or one which is handicapped by lack of specially trained teachers. The report contains program description, measures of student performance, tables on incidence and types of learning disabilities, and suggestions for implementing a program. (Author/RJ)

Charles E. Merrill Publishing Company, 4300 Alum Creek Drive, Columbus, Ohio 43216.

Descriptors: exceptional child education; learning disabilities; reading difficulty; educational diagnosis; learning processes; remedial reading; remedial instruction; language skills; study skills

The detailed manual deals with diagnostic techniques and program suggestions for learning disabilities. Areas discussed are the reading and learning process, determinants of learning patterns, the nature of reading and learning disabilities, the learner and symptoms of disabilities, informal diagnosis of abilities, specific diagnosis of disabilities, and programing for teaching reading. Other topics considered are remediation of

reading skills and tactile, aural-verbal, and visual skills, remediation of perceptual motor and cognitive abilities, severe learning disorders, understanding phonics, the visual approach to word recognition skills, comprehension and content areas, vocabulary building, and study skills and interest. Descriptors: exceptional child education; underachievers; slow learners; educational methods; educational diagnosis; remedial instruction; remedial programs; diagnostic teaching; learning disabilities; reading instruction; arithmetic; spelling instruction; language instruction; handwriting instruction

Designed as a guide to aid teachers of underachieving children, the text presents techniques and materials found successful with underachievers, suggests a specific remedial approach for underachievers, and outlines an orientation to remedial teaching. Discussed are the correlates of learning disability, the fundamentals of diagnostic and remedial teaching, case study techniques, reading diagnosis, word attack skills in reading, and vocabulary, comprehension, study skills, and reading rate. Additional areas of concern are the diagnosis and remediation of spelling problems, arithmetic difficulties, handwriting problems, and written and oral expression disabilities; plus the training and practice of the remedial teacher. Journal Of Learning Disabilities; V3 N5 P260-3 May 1970

Descriptors: educational research; educational diagnosis; reading readiness; check lists; student evaluation; evaluation methods

The article describes the results of a research study on the validation of a teacher checklist for diagnosis of reading readiness. The purpose of the study was to provide classroom teachers with a diagnostic tool for evaluating specific strengths and weaknesses in visual perception and auding. Such diagnostic information serves to assist teachers in planning a readiness program based on specific needs. (Author)

Prescriptive Teaching in Language Arts Remediation for Black Rural Elementary School Children.
EDRS not available
Journal Of Learning Disabilities; V3 N7 P364-70 Jul 1970

Descriptors: exceptional child research; Negro students; diagnostic teaching; language arts; elementary school students; psycholinguistics

Thirteen rural black elementary children participating within a school program which already included individualized language arts instruction were given intensive additional remedial exercises within the regular classroom. A comparable group of five children served as controls. Children in the treatment group received psycholinguistic remediation based upon Illinois Test of Psycholinguistic Abilities (ITPA) scores, linguistic patterning exercises and sound blending training. Visual strengths were used to help bolster auditory weaknesses and student motivation was increased through the application of techniques of behavioral reinforcement. Total Psycholinguistic Age (ITPA) was significantly higher for the experimental group following the three months treatment program. (Author)

Descriptors: exceptional child education; reading difficulty; educational diagnosis; remedial instruction; administrator role; principals; teacher role; reading consultants; reading programs; educational methods

Introduced by a look at the general problem of reading difficulties, the text discusses the roles of the principal, teacher, specialist, and administrator in treating the problem. The principal's responsibility, identification, home and family influence, environmental improvement, evaluating reading skills, leadership, and case studies of successful programs are described. Also examined are primary learning difficulties and current approaches to the problem, establishing a clinic program, University Reading Clinics, and a sample book list for a reading clinic. Classroom techniques are suggested for diagnosing reading problems, correction in groups and individually, and correction of specific problems found by diagnosis. The role of the specialist is also established for the diagnosis and treatment of reading problems. Methods of handling reading disability within a school are pre-

sented, and procedures are illustrated for establishing a program and correcting specific reading skills. (JM)

Prescriptive Teaching--A Cognitive Approach to Social and Interpersonal Learning.
EDRS not available
Teaching Exceptional Children; V2 N4 P158-62 Sum 1970

Descriptors: exceptional child education; behavior change; diagnostic teaching; interpersonal competence; cognitive objectives; teaching methods; social development; socially maladjusted

The use of diagnostic prescriptive teaching with socially deviant children, which is suggested if its use can improve social as well as academic functioning, is discussed. Advocated is the development of instructional programs based on social, moral, and interpersonal as well as academic prescriptions. A direct attack on the teaching of certain behaviors and skills to remediate moral, social, and interpersonal deficiencies, relying on a cognitive rather than affective approach, is the method suggested. The educational implications of decision making, the importance of providing meaningful choices, and the acquisition of social responsibility through assumption of responsibility for helping other students are also discussed. The Application of Some of J. Piaget's Observations to the Instruction of Children.
EDRS not available
Teaching Exceptional Children; V2 N4 P189-96 Sum 1970

Descriptors: exceptional child education; cerebral palsy; diagnostic teaching; behavior theories; learning activities; teaching methods; learning theories; Piaget

It is proposed that Piaget's approach to the analysis of children's behavior be used as a model for the ongoing evaluation required in diagnostic teaching. A set of teacher designed exercises which illustrates how this can be accomplished is presented. Although the exercises described were developed for a cerebral palsied child, the approach can be applied to the education of all children, normal as well as exceptional. (TL)

Descriptors: exceptional child education; identification; educational diagnosis; diagnostic teaching; testing; test interpretation; test construction; evaluation; culture free tests; learning disabilities; minimally brain injured; perceptual motor coordination; standardized tests; intelligence tests

Designed to prepare potential prescriptive teachers for classroom identification, diagnosis, and remediation of learning disabilities, this book presents 31 articles on philosophical and experimental data. Specific topics are test construction, planning and operating a testing program, analysis of classroom tests, measurement related to the educational process, interpreting test scores, culture-free testing, standardized tests, intelligence testing, aptitude and achievement tests, identifying creativity in adolescence, testing minority group children, and techniques of diagnosis and remediation for learning problems. Also included are articles on testing children with educational handicaps, learning disabilities, minimal cerebral dysfunction, central nervous system deficit, neurological handicaps, and reading disability. Perceptual motor aspects of learning disabilities are considered. Also treated are evaluation of communication skills, nationwide testing, and the question of test results for parents. Appended are a glossary of measurement terms, classification schemes for mental growth, selected bibliography, publishers of tests and materials, and a listing of tests. (MS)

EDRS not available

Fearon Publishers, 6 Davis Drive, Belmont, California 94002 (\$3.25).

Descriptors: exceptional child education; learning disabilities; diagnostic teaching; effective teaching; task analysis; teaching methods; individualized instruction; educational diagnosis; reinforcement

Written as a guide for diagnostic-prescriptive teachers desiring greater effectiveness in working with learning disabled children, the book has been designed for in-service and professional training programs but can also be used as a semiprogrammed self-instructional aid by the experienced teacher. Chapter discussions and accompanying programmed text cover: the personal characteristics, skills, and values of an effective diagnostic-prescriptive teacher, planning for individual needs, task analysis of student performance data for establishing appropriate educational and behavioral objectives, principles of prescriptive instruction, systematic reinforcement contingencies in the classroom to motivate students to learn, six common learning contracts and exchange systems for use with students with learning disabilities, techniques of negative reinforcement, and several alternative or supplemental strategies (psychoeducational consultants, case review meetings, conjoint intervention programs, teacher's aides, learning resource centers). Changing Classroom Behavior: A Manual for Precision Teaching.

EDRS not available

International Textbook Company, Scranton, Pennsylvania 18515 (\$2.95).

Descriptors: behavior; behavior change; teaching methods; scientific attitudes; reinforcement; behavioral objectives; behavior problems; learning; measurement techniques; educational research; mentally handicapped; disadvantaged youth; emotionally disturbed; precision teaching

The discussion of Precision Teaching, attempting to integrate humanism and behaviorism (what we know as educators and as behavioral scientists), provides both specific guidelines for teachers concerning positive classroom behavior change, and general directions in which education must go to remain relevant. The concept of Precision Teaching is discussed in terms of objective study of classroom behavior and classroom application of scientific developments in understanding of human learning, emphasizing the teacher's ability to influence student behavior by modifying the classroom environment. Outlined are specific principles of learning to be applied by the teacher to enhance learning and improve behavior. Chapters discussing behavior measurement, goals, strengthening desirable behavior and eliminating the undesirable, providing cues for learning, and programing are illustrated with research findings. Additional applications of precision teaching and behavior modification are covered in chapters on educational developments in mental retardation, social deprivation, and severely deviant behavior (emotionally disturbed children), in addition to application in the normal classroom. Paper Presented At The First Symposium On Behavior Modification (Xalapa, Mexico, January, 1971).

Descriptors: exceptional child research; emotionally disturbed; behavior change; early childhood; teaching methods; socially maladjusted; technology; individualized instruction; research proposals

To fabricate a technology for teaching young school children with serious behavior problems, classroom materials, curriculum format, and teaching procedures were developed, and problems that evolve from the technology investigated. Two classrooms were architecturally designed to provide the basic needs of a special classroom and to facilitate observation of the children and data collection. The basis of the technology was individualized instruction. Research studies derived from the experiment were cited and implications of a technology of special teaching explored. (CD)

Descriptors: exceptional child research; disadvantaged youth; slow learners; intervention; preschool education; diagnostic teaching; kindergarten children; compensatory education

Designed to gather evidence on the effectiveness of an intensive year of specific curriculum intervention on a severely disadvantaged population, the study involved 10 groups of approximately 14 psychosocially disadvantaged 5-year-olds each, for whom Stanford-Binet IQ scores were 50-85. Over 3 years, three groups were exposed to a diagnostic experimental kindergarten curriculum, three groups to a nonexperimental kindergarten, and four remained at home with no formal program. The experimental program included an intensive, structured, cognitively oriented curriculum designed to remedy observed cognitive and affective deficits of individual children. Personal-social adjustment, language development, and motor development aspects of the program are detailed, including sample lessons. Results showed the experimental program more effective than the regular kindergarten in ameliorating effects of severe psychosocial deprivation among the subjects, with at-home residence least effective in improving intelligence level, language, personal-social adjustment, and motor skills. A 1 and 2-year followup of adjustment to regular school more often supported than rejected the hypothesis that experimentals would perform better than the regular group, which would do better than the at-home groups, in all areas except motor skills. Precision Teaching Helps Children Learn. EDRS not available
Teaching Exceptional Children; V3 N3 P106-10 Spr 1971

Descriptors: exceptional child education; precision teaching; measurement techniques; learning disabilities; charts; records (forms); teaching methods

A teacher of elementary school children with specific learning disabilities describes how precision teaching helped three students solve specific problems in math and behavior (excessive yawning). How charts are used by the teacher and student to record the student's progress, motivate the student to perform at a higher level, show the student he is learning, and help the teacher in planning appropriately to meet the needs of each individual student is explained. The value of such continuous records not only for individualizing instruction and motivating learning but also for helping teachers evaluate the effectiveness of their teaching is pointed out. Sample Standard Daily Behavior Charts are reproduced. (KW)

Precision Teaching In Perspective: An Interview with Ogden R. Lindsley.
EDRS not available
Teaching Exceptional Children; V3 N3 P114-9 Spr 1971

Descriptors: precision teaching; measurement techniques; evaluation methods; effective teaching; records (forms); teaching methods

Precision teaching, a new technique in special education, is discussed by the educator who developed and shaped the idea, Ogden R. Lindsley. Described are the origins of precision teaching, how it differs from behavior modification, and implications of precision teaching for regular and special education now and in the future. The values of recording daily frequency of a student's performance are shown to be in their usefulness to teachers in monitoring instruction and evaluating curriculum and teaching, as well as in the area of behavior change. It is emphasized that precision teaching is not an approach to classroom teaching designed to replace other teaching methods. Rather, it is an easy, inexpensive system of monitoring daily improvement, intended simply to add a more precise measurement instrument to present teaching, making that teaching more efficient and effective (KW)

Parent Classes In Precise Behavior Management.
EDRS not available
Teaching Exceptional Children; V3 N3 P120-8 Spr 1971

Descriptors: exceptional child education; trainable mentally handicapped; behavior change; charts; parent role; precision teaching; parent education; mentally handicapped; measurement techniques

Described are parent classes in precise behavior management for parents of severely retarded children, in which parents were taught how to use the measurement tools of precision teaching to increase the frequency of desirable behaviors and decrease the frequency of undesirable behaviors in their children. Strategies and principles for developing such parent classes are enumerated. Instructions given to parents for recording on Standard Behavior Charts the frequency of the selected behavior and for using the chart as an evaluation tool in their behavior management project are summarized. A behavior chart accompa-

nies the description of a sample parent behavior modification project, in which a 7-year-old PKU boy's incessant rocking behavior was successfully decreased with the help of the tools of precise behavior management. (KW)

Peers and Precision.
EDRS not available
Teaching Exceptional Children; V3 N3 P129-32, 137-40 Spr 1971

Descriptors: tutoring; teaching methods; student participation; measurement techniques; precision teaching; charts; elementary school students

A peer tutoring project is described in which one first grade student was taught to tutor four classmates in naming geometric figures. These four then tutored the rest of the class. All students learned to name all seven geometric figures correctly. Precision teaching methods were used to measure and chart all student performance on a daily basis. One student tutor was taught to collect frequency data on his tutees and to chart their performances. Two of his four charts are presented to illustrate his precision in charting. It is concluded that peer tutoring is a time and energy saving device for the teacher, is rewarding for the students, is effective, and can help increase the academic performance of advanced students. Summarized is a case in which precision teaching techniques were applied in planning and carrying out multiple projects with a 7-year-old child in a special class, who had disruptive behaviors, difficulties in schoolwork, and short spasms or epileptic-like starts. Behaviors worked on in the precision teaching projects were addition and subtraction facts, leaving gym without permission, and the starts. Behavior charts indicating daily frequency of target behaviors are presented, illustrating the success of the projects to these three behaviors. The values of using Standard Daily Behavior Charts and of having students manage their own projects are pointed out. (KW)

Applying Precision Teaching to Academic Assessment.
EDRS not available

Teaching Exceptional Children; V3 N3 P147-50 Spr 1971

Descriptors: exceptional child education; learning disabilities; behavior change; precision teaching; evaluation methods; measurement techniques; student evaluation

Precision teaching was used to evaluate a student's difficulty with basic addition facts and, after initiating a change in the teaching plan to improve addition skills, to evaluate the student's performance to determine the effect of the change. Measurement of the frequency of correct and incorrect responses to addition problems showed that awarding points for correct answers, exchangeable for free time, was effective in improving mathematics performance. It is concluded that precision teaching provides a system which allows the teacher to determine a student's actual performance and to evaluate the effect of any change in teaching procedures on the student's behavior. Charting thus assists the teacher in both planning individual instruction and determining its effectiveness. (KW)

To order ERIC REPORTS include complete information for all order form items. Please print or type all information clearly.

1. Complete "bill to" and "ship to" addresses. Be sure to complete "ship to" address if different from "bill to". A like "ship to" address may be completed as "SAME". Include zip code.

2. Order by printing ED number in designated space. EO accession numbers are listed in Research in Education (RIE). RIE may be purchased from: Superintendent of Documents, GPO Washington, O.C. 20402.

3. Include number of copies (1, 2, 3, etc.) to be ordered in appropriate space. Use MF space for microfiche copies, use HC space for hard copy (paper). Check RIE for availability of document in MF and HC.

4. Include price from the rate schedule. (Refer to price schedule on back.) Prices are also published in current issues of RIE.

5. Some ED numbers represent a series of titles, and will be billed by title, not EO number. A list of applicable ED numbers is available.

6. Extend number of copies and price for total price for each entry.

7. Add items 1 through 15 and insert amount in "Sub-Total" box.

8. Add state sales tax for Illinois and Maryland or check box and cite tax exemption number for Illinois and Maryland only.

9. Add "Sub-Total" and "Tax" and insert amount in "Total" box.

10. Indicate payment method desired. Payment must accompany all orders of \$10.00 or less. Make all drafts payable to EDRS.

11. Sign AUTHORIZATION and date order.

12. Include only 15 entries per form. Complete and sign additional forms if required.

13. Quality warranty. LIPCO will replace products returned because of reproduction defects or incompleteness. The quality of the input document is not the responsibility of LIPCO. Best available copy will be supplied.

ERIC DOCUMENT REPRODUCTION SERVICE is operated by Leasco Information Products, Inc. for the U.S. Office of Education.

Orders are filled only from ED accession numbers. Titles are not checked. Please be sure you have supplied the correct numbers.

401 - 500	16.45

Each Additional 100 pages or portion thereof. 3.29

1. Book Rate or Library Rate postage is included in above prices.
2. The difference between Book Rate or Library Rate and first class or foreign postage (outside the continental United States) rate will be billed at cost.

TERMS AND CONDITIONS

1. PRICE LIST

The prices set forth above may be changed without notice; however, any price change will be subject to the approval of the U.S. Office of Education Contracting Officer.

2. PAYMENT

The prices set forth above do not include any sales, use, excise, or similar taxes which may apply to the sale of microfiche or hard copy to the Customer. The cost of such taxes, if any, shall be borne by the Customer.

Payment shall be made net thirty (30) days from date of invoice. Payment shall be without expense to LIPCO.

3. REPRODUCTION

Materials supplied hereunder may only be reproduced by not-for-profit educational institutions and organizations; provided however, that express permission to reproduce a copyrighted document provided hereunder must be obtained in writing from the copyright holder noted on the title page of such copyrighted document.

4. CONTINGENCIES

LIPCO shall not be liable to Customer or any other person for any failure or delay in the performance of any obligation if such failure or delay, (a) is due to events beyond the control of LIPCO including, but not limited to, fire, storm, flood, earthquake, explosion, accident, acts of the public enemy, strikes, lockouts, labor disputes, labor shortage, work stoppages, transportation embargoes or delays, failure or shortage of materials, supplies or machinery, acts of God, or acts or regulations or priorities of the federal, state, or local governments, (b) is due to failures of performance of subcontractors beyond LIPCO's control and without negligence on the part of LIPCO, or (c) is due

to erroneous or incomplete information furnished by Customer.

5. LIABILITY

LIPCO's liability, if any, arising hereunder shall not exceed restitution of charges.

In no event shall LIPCO be liable for special, consequential, or liquidated damages arising from the provision of services hereunder.

6. WARRANTY

LIPCO MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO ANY MATTER WHATSOEVER, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

7. CHANGES

No waiver, alteration, or modification of any of the provisions hereof shall be binding unless in writing and signed by an officer of LIPCO.

8. DEFAULT AND WAIVER

a. If Customer fails with respect to this or any other agreement with LIPCO to pay any invoice when due or to accept any shipment as ordered, LIPCO may without prejudice to other remedies defer any further shipments until the default is corrected, or cancel this Purchase Order.

b. No course of conduct nor any delay of LIPCO in exercising any right hereunder shall waive any rights of LIPCO or modify this Agreement.

9. GOVERNING LAW

This Agreement shall be construed to be between merchants. Any question concerning its validity, construction, or performance shall be governed by the laws of the State of New York.
